

# TAILAI WANG

COMPUTER SCIENCE AND BUSINESS ADMINISTRATION DOUBLE DEGREE STUDENT

☎ (519) 999-4890 | ✉ [tailai.wang@uwaterloo.ca](mailto:tailai.wang@uwaterloo.ca) | 🌐 [github.com/tailaiwang](https://github.com/tailaiwang) | 🌐 [tailaiwang.me](https://tailaiwang.me)

## TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, Swift, JavaScript, Scheme, SQL  
Tools/Technologies: MongoDB, Express.js, React.js, Node.js, AWS, Git, HTML/CSS

## EXPERIENCE

### Sonova

Winter 2021

*Software Developer Intern - iOS*

*Kitchener, Canada*

- Creating HIFinder application & dashboards using **Swift** and **UIKit** to enhance hearing aid usability
- Using **Django** and **Flask** to implement new API features and personalization options

### knct - [knct.world](https://knct.world)

Jul 2020 - Present

*Full-Stack Software Engineer*

*Lausanne, Switzerland*

- Worked closely with founders to build core community application of the **EPFL La Forge** startup
- Created new **Express.js API** features for communities & conversations, enabling increased customization
- Enhanced user experience through standardized form validation using **Typescript** and **React Formik**
- Performed **User Acceptance Testing** and critical hotfixes in weeks leading to product launch
- Led product team to prototype **Business Intelligence API**, aggregating **3 analytics systems**

### Questrade Financial Group

Apr 2020 - Aug 2020

*Production Engineering Intern*

*Toronto, Canada*

- Monitored trading & market data routing using **Splunk** dashboards to maintain **99.9% uptime**
- Cut response times by **90%** by automating **company-wide** alerts using **JavaScript** & **G-Suite API**
- Developed HRM app using **MERN** stack, enabling incident simulation training and team analytics
- Performed key data fixes for Business Intelligence on **MySQL** ledgers involving **over 10000 accounts**

## PROJECTS

### To The Moon - [Devpost Link](#)

Hack the North 2020++

- Scraped *r/wallstreetbets* using **PRAW** on **Jupyter Notebook** to aggregate stock discussion posts
- Created data pipeline with **Pandas** and **Droptbase** to create a real-time scraping database
- Developed **Flask API** with **Google Cloud NLP** to make stock picks through market sentiment analysis
- Made **React.js** charts to showcase **almost 50** most bullish/bearish stocks traded on NYSE/NASDAQ

### Taxmaps - [Devpost Link](#)

WinHacks 2020

- Awarded "**People's Choice Award**" at WinHacks 2020 from a pool of **74 projects**
- A personal finance app built using **React.js**, **Node.js**, and **CRA Tools** to empower taxpayers with spending visualization and political tax-plan comparisons.

### MomsOverMatter - [lleTTonna.com](https://lleTTonna.com)

lleTTonna

- Developed *MomsOverMatter*, a free medical information tool for depression treatment for new mothers
- Used **PostgreSQL** and the **MERN** stack to implement questionnaire features and web app components
- Created standardized **Express.js** endpoints to export surveys to doctors, **halving administration time**

## LEADERSHIP

### The GoldenHack - [thegoldenhack.ca](https://thegoldenhack.ca)

Event Organization

*Vice President of Operations (2020-2021), Full Stack Developer (2019-2020)*

- Leading logistics for judges, mentors, and volunteers at Canada's first hybrid entrepreneurship hackathon.
