AILAI WANG

Computer Science and Business Administration Double Degree Student

□ (519) 999-4890 | ► tailai.wang@uwaterloo.ca | O github.com/tailaiwang | O tailaiwang.me

Technical Skills

Programming Languages: Python, Java, C/C++, Swift, JavaScript, Scheme, SQL

Tools/Technologies: MongoDB, Express.is, React.is, Node.is, AWS, Git, HTML/CSS

EXPERIENCE

Sonova Winter 2021

Software Developer Intern - iOS

Kitchener, Canada

• Creating HIFinder application & dashboards using Swift and UIKit to enhance hearing aid usability

• Using **Diango** and **Flask** to implement new API features and personalization options

knct - knct.world July 2020 - Present

Full-Stack Software Engineer

Lausanne. Switzerland

- Worked closely with founders to build core community application of the EPFL La Forge startup
- Created new Express.js API features for communities & conversations, enabling increased customization
- Enhanced user experience through standardized form validation using Typescript and React Formik
- Performed User Acceptance Testing and critical hotfixes in weeks leading to product launch
- Led product team to prototype Business Intelligence API, aggregating 3 analytics systems

Questrade Financial Group

Spring 2020

Production Engineering Intern Toronto, Canada • Monitored trading & market data routing using Splunk dashboards to maintain 99.9% uptime

- Cut response times by 90% by automating company-wide alerts using JavaScript & G-Suite API
- Developed HRM app using MERN stack, enabling incident simulation training and team analytics
- Utilized GitLab for version control and tracked requests & upgrades through JIRA & Confluence

Projects

To The Moon - Devpost Link

- Scraped r/wallstreetbets using PRAW on Jupyter Notebook to aggregate stock discussion posts
- Created data pipeline with Pandas and Dropbase to create a real-time scraping database
- Developed Flask API with Google Cloud NLP to make stock picks through market sentiment analysis
- Made React.js charts to showcase almost 50 most bullish/bearish stocks traded on NYSE/NASDAQ.

Taxmaps - Devpost Link

WinHacks 2020

- Awarded "People's Choice Award" at WinHacks 2020 from a pool of 74 projects
- A personal finance app built using React.js, Node.js, and CRA Tools to empower taxpayers with spending visualization and political tax-plan comparisons.

MomsOverMatter - lleTTonna.com

lleTTonna

- Developed MomsOverMatter, a free medical information tool for depression treatment for new mothers
- Used PostgreSQL and the MERN stack to implement questionnaire features and web app components
- Created standardized Express.js endpoints to export surveys to doctors, halving administration time

Leadership

The GoldenHack - thegoldenhack.ca

Event Organization

Vice President of Operations (2020-2021), Full Stack Developer (2019-2020)

- Leading logistics for judges, mentors, and volunteers at Canada's first hybrid entrepreneurship hackathon.
- Worked in Agile development teams to launch Cognito application processing systems and wesbite
- Collaborated through Git to use Lambda and DynamoDB to create a data pipeline for applications

JDCC Laurier - cabsonline.ca

Education

Academic Delegate - Digital Strategy

- Representing the Laurier Case Team as an Academic Competition delegate in the **Digital Strategy** tract
- Solved and presented case problems in digitalization, tech consulting, and business innovation

EDUCATION

University of Waterloo and Wilfrid Laurier University

Sep 2019 - Present
